

### OUR EXPERTISE

A world leader in managing climate change risk, DNV assists companies, organisations and governments in their efforts to mitigate emissions. Our services include the three Kyoto Protocol mechanisms and voluntary emission reduction efforts. DNV is a knowledge-based company, and at the forefront when it comes to supporting development of new clean technologies, energy efficiency projects, and research in areas such as carbon capture and storage. We have a broad greenhouse gas verification and certification expertise combined with specific industry knowledge.

### WHY DNV?

- Early mover and leader in the carbon market
- A leading company for validation and verification of CDM/JI projects
- Extensive carbon knowledge
- Broad understanding of the regulated market
- Access to top players in the carbon industry
- A trusted partner for exploring new challenges

As an independent foundation with the objective of safeguarding life, property and the environment, we believe in a partnership approach toward sustainable business.

DNV Climate Change Academy and Network

# COLLABORATION is key in responding to the carbon challenge

## THE CHALLENGE

The considerable shortage of competence and competent people has become one of the major challenges for the carbon market and its players. A strategic response to the competence challenge is necessary to prevent the industry from undermining itself and lose credibility with regulators and investors. It is also vital in order to be able to capitalize on growth opportunities.

## HOW WE CAN HELP YOU?

The **DNV Climate Change Academy and Network** is a unique and exclusive community concept created to build knowledge and competence for leading players in the carbon market. By bringing together key stakeholders, we can build and share knowledge and identify common challenges and opportunities. Together we will create competencies that enable the development of practical and shared solutions and considered responses to the carbon challenges.

The DNV Climate Change Academy and Network is comprised of three levels. Competence building is the first stepping stone.

## DNV CLIMATE CHANGE ACADEMY

### Competence

#### Objective:

To build key carbon competence.

#### Features

- Climate Change foundation training & certification
- Company specific training
- Climate Change executive training

The course portfolio mirrors the current carbon market competence needs. The DNV Climate Change Academy also has a Carbon Professional Qualification scheme for qualification of climate change experts. The scheme consists of three levels. Once a carbon professional has completed all the levels, he or she will be highly competent in key strategic operational and technical aspects of the carbon market.

#### Benefits

- Support growth and profitability
- Enable productivity and innovation
- Ensure quality and professionalism
- Attract and retain top talent

Attending the DNV Climate Change Academy will help you and your company maintain credibility with regulators and investors.

## DNV CLIMATE CHANGE NETWORK

### Partnerships

#### Objective:

To create a professional network that builds and shares knowledge on key strategic and operational issues in the carbon market value chain.

#### Features

- CxO exclusive events
- Exclusive network events
- Community infrastructure

Membership in the DNV Climate Change Network is by invitation only. The network is business driven, focusing on creating business and professional opportunities for its members.

#### Benefits

Learn from other network members with different competencies and experiences. You can also grow new partnerships that lead to better solutions. Collaboration through a strong professional network enables us, as individuals and companies, to achieve our goals more effectively and efficiently.

## DNV CLIMATE CHANGE ROUNDTABLE

### Strategy & Innovation

#### Objective:

To form a carbon forum through which you can enable your business strategies and support growth.

#### Features

Meet leading business, science and political figures through:

- Member conferences
- Roundtable discussions

Open to the leading members of the DNV Network, the DNV Climate Change Roundtable will be working to set best practices for the carbon market and be a leading voice.

#### Benefits

- Develop cutting edge insight
- Build and execute your business strategies
- Support growth
